

SPEC SHEET

Automated Modular Clean In Place Unit (CIP Cleaning System)

INTRODUCTION

The CIP Cleaning System is widely used in industries with high requirements for cleaning, such as daily chemical, biological fermentation, and pharmaceuticals, in order to achieve the effect of sterilizing. According to the process condition, single tank type, double tank type, and separate body type can be chosen. Smart type and manual type are also optional.

Our automated CIP Cleaning Systems clean and sanitize the inside of your tanks, equipment, filters, pipes, and fittings – all without disassembly. This saves you time, money, and keeps your workers safe.

With our proven track record, you can be confident that our CIP systems will help you achieve the highest standards of hygiene and sanitation.

KEYWORDS CIP | Cleaning | Piping | Tank

Our systems are provided built to order – contact us today and our team will be happy to assist with a customized product for your specific needs.

While the information has been carefully compiled to the best of our knowledge, nothing is intended as representation or warranty on our part and no statement herein shall be construed as recommendation to infringe existing patents.
